FMETP STREAM Meta Quest VR Passthrough Template

This is a template based on Meta Quest passthrough feature. For the ease of testing, we suggested that you may unzip the full package in Fab's "additional files", or clone it from our github page.

However, you can also create a new Unity3D project and import all the package dependencies.

With **FMETP STREAM 6** (which was purchasable via Asset Store before March 31, 2026, now hosted on our own webpage), you can access the Quest VR webcam and stream your In-Game result as mixed reality to any Unity build.

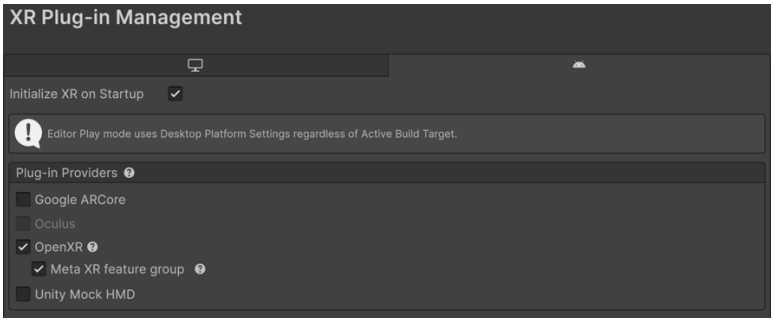
For technical support, please reach us via email: thelghome@gmail.com

Package dependencies

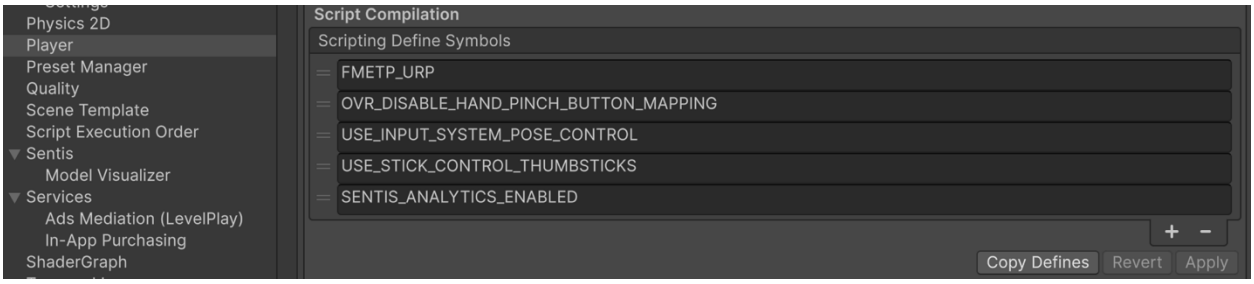
- Meta MR Utility Kit (Packages - Asset Store)
- Meta XR Core SDK (Packages - Asset Store)
- Sentis (Packages – Unity, install package by name: com.unity.ai.inference)
- OpenXR Plugin (Packages – Unity)
- FMETP STREAM 6 (Packages - Asset Store, or via homepage: https://frozenmist.com)

Before building app for Quest VR

In Project Settings/XR Plug-in Management/Project Validation, make sure you've been resolved all errors when building Android apk for Quest VR, and choose OpenXR.



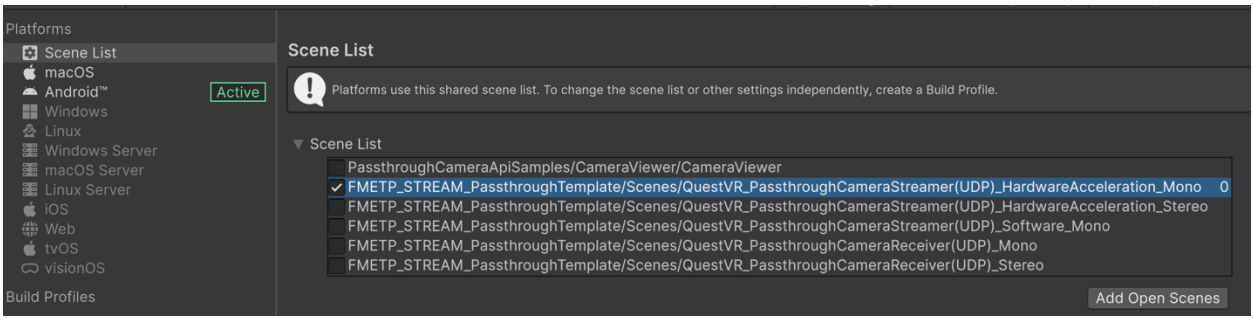
Meanwhile, please also check "FMETP_URP" in Scripting Define Symbols, if your project is running as URP or HDRP etc.



Option A: Quick Test(Recommended)

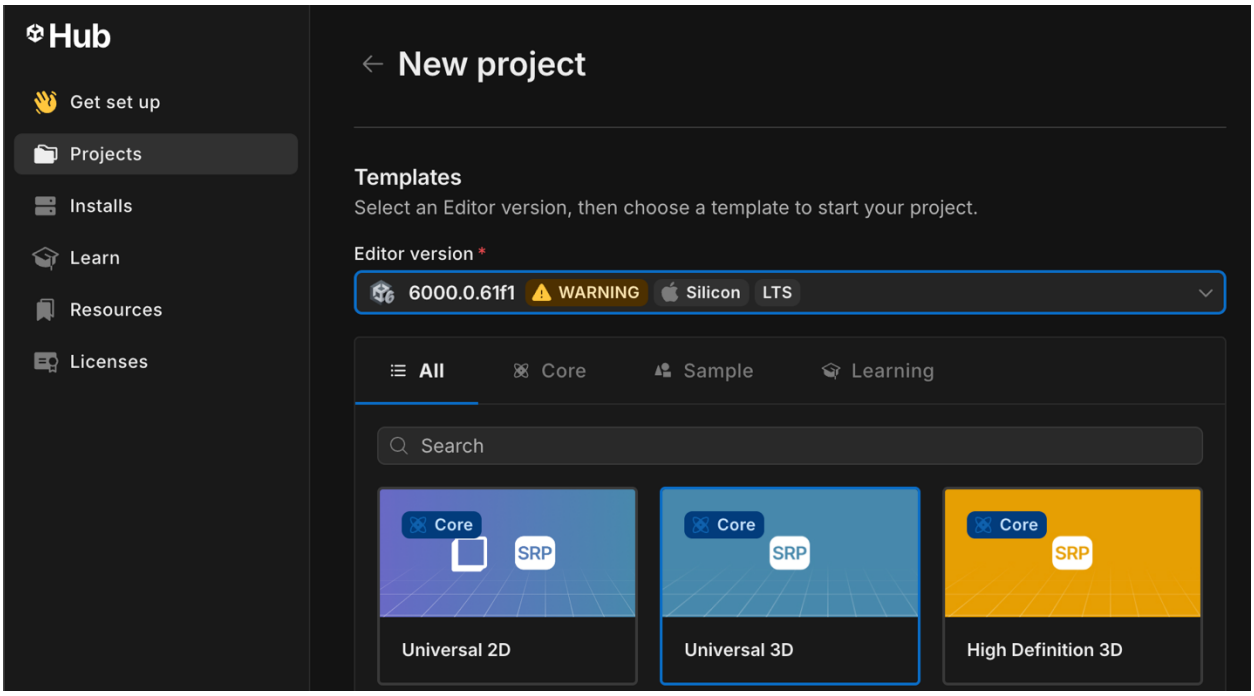
You may clone our full Unity project from github:
https://github.com/FMSDK/fmetp_tutorial_questvr_passthrough

Viewer Scene: QuestVR_PassthroughCameraReceiver(UDP)_Mono
Android build: QuestVR_PassthroughCameraStreamer(UDP)_HardwareAcceleration_Mono



Option B: Create New Project

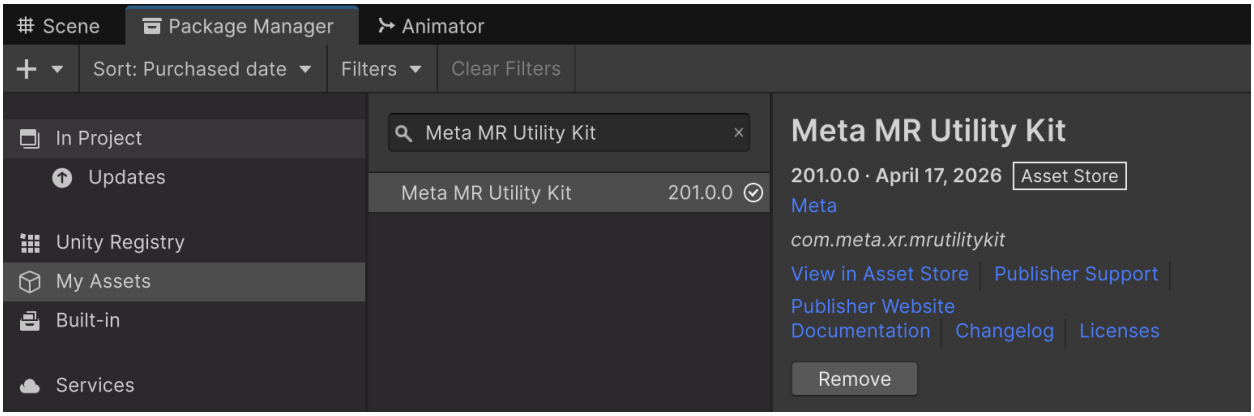
Create Unity3D Project using Unity 6000.0.61f1 or above.



Import Package dependencies: Meta Quest VR components

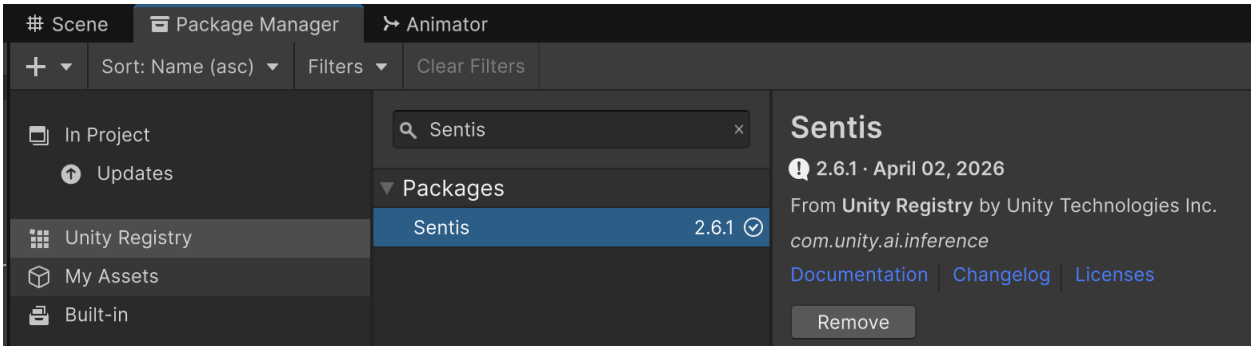
Import Asset Store package: Meta MR Utility Kit

(or install package by name: com.meta.xr.mrutilitykit)

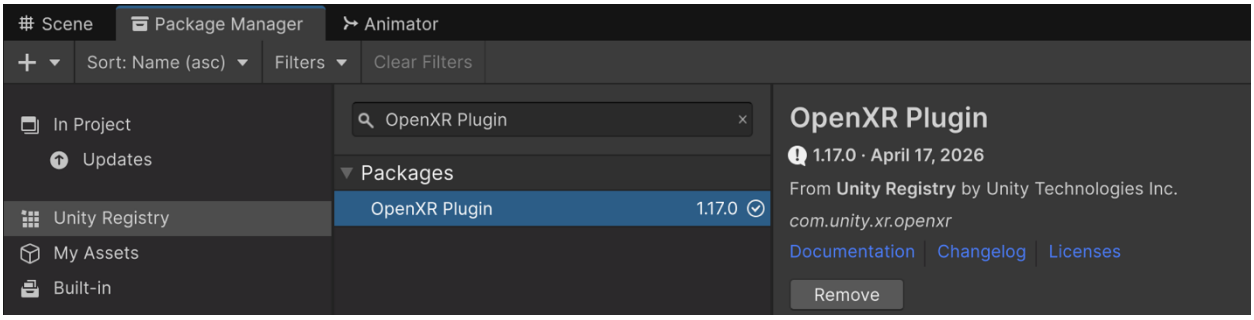


Import Unity Registry package: Sentis

(or install package by name: com.unity.ai.inference)

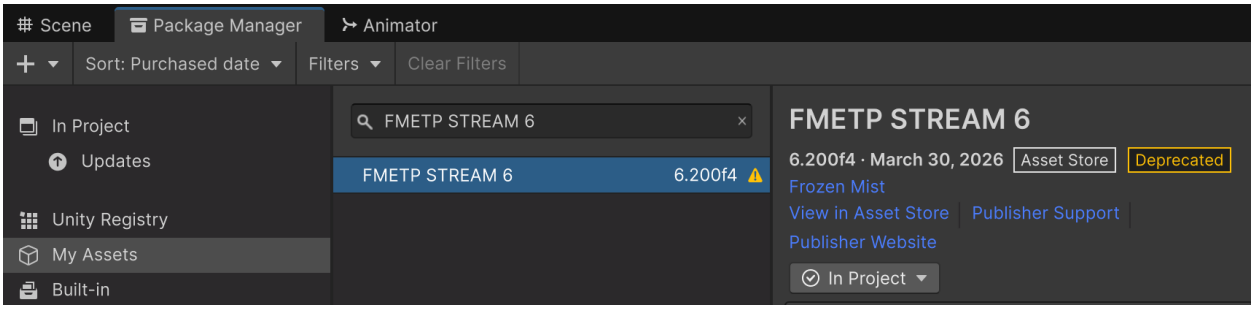


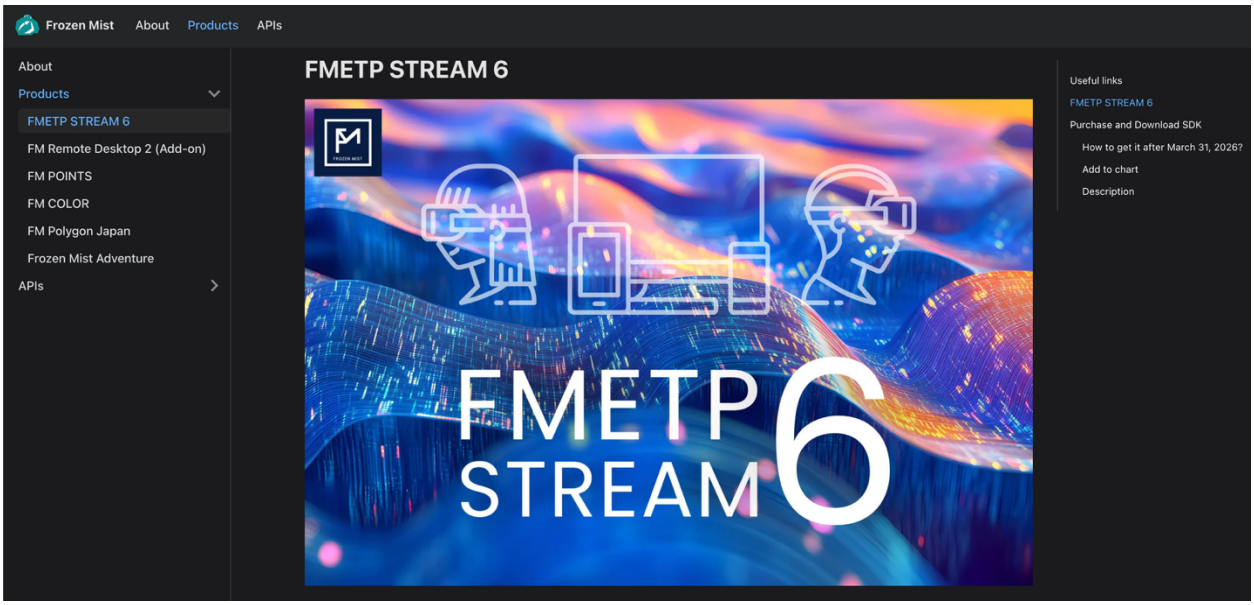
Import Unity Registry package: OpenXR Plugin



Import Package dependencies: FMETP STREAM 6

You may import it via Asset Store Package Manager



or, get it via our product page(after March 31, 2026):


https://frozenmist.com/docs/Products/FMETP-STREAM
